## Macromedia Dreamweaver MX 2004

**Who**

This two day intensive course is suitable for those about to use Dreamweaver for creating and managing web pages. Familiarity with the operating system and keyboard is a course prerequisite.

**Why**

With Dreamweaver, you will learn how to create cross-platform pages and use Macromedia's Roundtrip™ technology which imports HTML documents without reformatting the code. You will learn how to use Dreamweaver's Dynamic HTML features without having to write a line of code and get to use Dreamweaver's browser-targeting which checks your work for potential problems.

**Length**

2 days
